● Introduction

Saudi Equipment and Supplies Company (SESC) operates from Riyadh, Saudi Arabia , and was established in 1982. Specialized in factory automation, design and supply of production and packaging lines. has Emerged as Turnkey Engineering Solution Provider in Processing, Packaging Conveyance, & Automation.

SESC's activity is concentrated in two main areas:

- Food, beverages and consumables industries.
- Manufacturing sector.

Chairman Message:

We are at SESC committed to providing solutions that meet the appropriate needs of our customers, improve performance efficiency and increase productivity. SESC has become the preferred choice for companies looking for advanced industrial solutions, and we are very pleased to provide technical support and after-sales services at the highest level and excellent service, which shows our pride, to be a reliable supplier in the Kingdom. We also take great pride in the specialized engineering expertise and the marketing and technical team that pays all the effort to turn the customer's vision into reality, through the strategic relationship with the best international manufacturers in their fields.

We believe that quality and technical excellence are the basis of success in our business and we guarantee our valued customers technical solutions that exceed their expectations.

Best regards,,,

OUR VISION:

We seek to provide integrated and innovative technical solutions in the development of specialized factories and production lines, and we are sure that innovation and excellence in providing technical solutions are the basis for achieving satisfaction for our customers and growing our business.

Our Mission:

Providing comprehensive and integrated solutions in the field of factory automation, packaging and conveyances through continuous cooperation with the best global suppliers.

Our Values:

Values: We strive to deliver the best values to our customers through innovation and effective technical solutions.

Ethics: Integrity and professionalism are the foundation of all our business.

Collaboration: We respect our relationships based on trust and effective cooperation and always strive for a sustainable partnership.

Innovation: We use advanced technologies to deliver high-level engineering solutions capable of meeting market needs.

Relationships: We see the relationship with our partners as an strategic partnership based on trust and mutual respect.

Quality Policy:

The International Standard for Total Quality (ISO 9001) refers to one of the most famous international standards related to quality, which aims to improve the performance of organizations and ensure that customer requirements are met, so we are committed to providing our customers with reliable and effective services in accordance with the company's mission and vision, as  relies on an integrated quality management system that meets international quality standards.

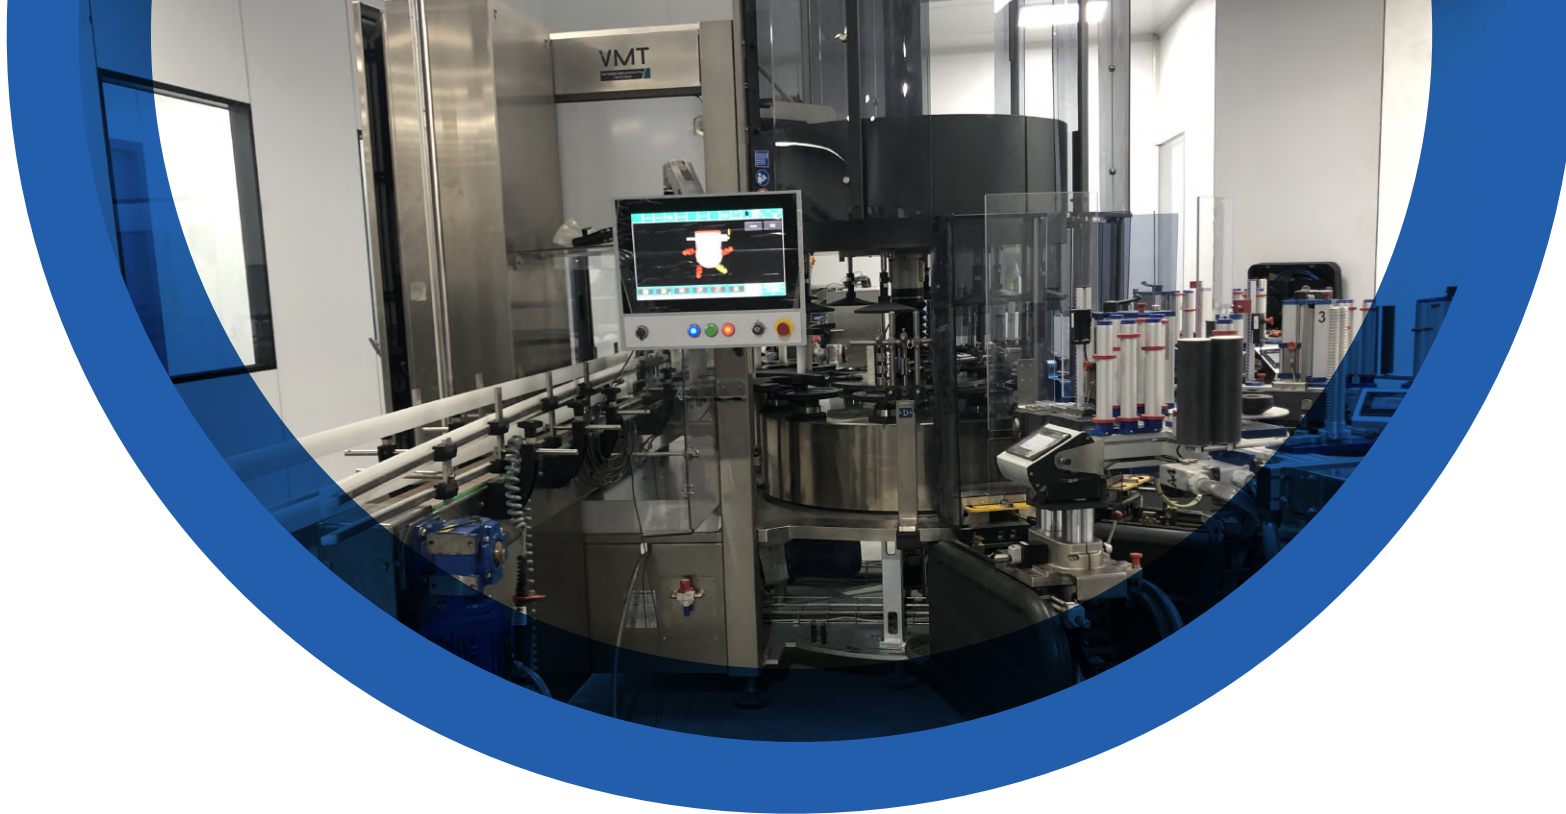

We also ensure compliance with the company's contractual obligations and the requirements of ISO 9001 certification through the following procedures:

- Strictly implement all activities affecting services with the implementation of a system of continuous monitoring and follow-up.
- Taking into account quality indicators and constantly reviewing all relevant information to improve the quality of business.
- Provide continuous training and raise the degree of quality awareness among all employees.

Health & Safety:

The international standard for health and safety (ISO45001) is one of the means and trends that govern the management of health and safety in institutions and organizations, which is the goal of  and we work to provide a safe and healthy work environment for teams in the workplace, and our policy is based on the principle of "safety first" through early planning and implementation of business stages in ways that ensure that there is no conflict between health and safety requirements and processing processes.

“ Environment & Sustainability

The international standard ISO is dedicated to helping organizations improve their environmental performance, reduce adverse environmental impacts and conserve natural resources.

Implement effective actions and policies to reduce these risks, improve performance, reduce costs associated with pollution, corrective measures and improve environmental efficiency.

At  we are committed to protecting the environment and achieving sustainability through the optimal utilization of resources and we reflected this in our green and blue logo.

Policies and compliance with international standards are reviewed every " 12months" to ensure that they are up to date and in line with legal and regulatory developments and requirements.
